EXPERIENCE

Entrepreneur

Independent, July 2023 – present, Toulouse, France

Development of a POS system for restaurants in south of France. Added features to the current application and created new features from scratch to replace the aging solution.

- Made with **HTML/CSS** and **Javascript.**
- Used **React** up-to-date good practices with hooks, contexts and rooting using **react-router**.
- Collaborated with sales and current developer for the project.
- Used different design systems, **Bootstrap** then **Material UI**.
- Code versioning with **Git** and **Github**.
- Design and prototyping with **Figma**. Made a feedback loop with customers.
- Build, setup and tooling with **Vite**. Testing with **Vitest**.
- Server made with **Node**, using **express** and **sequelize**.
- Relational database with **MySQL**.
- Implemented **responsive design** principles to ensure the application worked on different screen sizes.

| Figma | React | HTML | CSS | Javascript | Git | Responsive Design |

Tourist Guide

Château Michel-de-Montaigne, March 2023 – May 2023, Saint Michel de Montaigne, France

Reception and guidance of tourists in a 19th century castle in the Bordeaux wine region. Design of a support for the visit in Russian. Experience selling wine.

| Communication | Team Work | Autonomy |

PROJECTS

Little Lemon and Lucky Shrub

Two website, one for a restaurant with table booking, and the other one for a plant seller e-shop, both using **React**.

Hello World

A social media platform to comment on events, with mandatory sources, using a Tinder-like swipe mechanism. Made with **React**, **Express** and **MongoDB**.

Sweet Cakes

A dessert listing website made with **Next**. Made for the challenge of learning another framework.
